TestPoint.java

```java
public class TestPoint {
    public static void changePoint(int[] point){
        point[0]++;
        point[1]--;
    }

    public static void main(String[] args) {
        Point p1 = new Point();
        p1.x = 10;
        p1.y = 10;

        int[] point = new int[2];

        point[0] = p1.x;
        point[1] = p1.y;

        System.out.println("value of x before calling method: " + point[0]);
        System.out.println("value of y before calling method: " + point[1]);

        changePoint(point);

        System.out.println("value of x after calling method: " + point[0]);
        System.out.println("value of y after calling method: " + point[1]);

    }
}
```

Point.java

```java
public class Point {
    int x;
    int y;
```

```
}
    ctivity\bin' 'TestPoint'
    value of x before calling method: 10
    value of y before calling method: 10
    value of x after calling method: 11
    value of y after calling method: 9
